

**Ultraflex® — the only technology that can control ALL planes of motion and stretch multiple joints in one orthosis.**

Comprehensive day/night neuro-orthotic rehabilitation  
Increase ROM, reduce spasticity, improve gait and increase compliance

- **LLPS (low load, prolonged-duration stress) is clinically proven to improve ROM**
- **Increase both dynamic R1 (angle of catch) and R2**
- **Level 2 evidence** demonstrates clinical superiority in ROM, reduce spasticity and increase compliance<sup>1</sup>
- Gait fine-tuning with Ultraflex Adjustable Dynamic Response™ to improve crouch, equinus and their variations
- Improve reach, grasp and pinch with FirstFlex<sup>2, 3, 4</sup>
- Pediatric and adult
- Custom-made from cast for each patient
- Patient selected colors and patterns for optimal aesthetics
- Easy to don/doff with biomechanically correct positioning
- Next generation spring technology provides consistent, reproducible tension with fewer adjustments than older technology
- Single patient use; purchased by most insurance providers
- A certified professional will evaluate, fit and follow your patient's care

Positively impacting daily lives:  
200,000+ Ultraflex patients  
200,000+ individualized solutions  
Over 23 years of experience

Patient Inspired Solutions

# Neurological Solutions

**Addressing neuro dynamic/static muscle ROM limitations and common gait deviations**

## Introducing Ultraflex ONE™ The ONE™ solution for all your rehab needs.

Ultraflex ONE™ is a patent pending, breakthrough technology that provides protection, stability, functional assist and LLPS in ONE™ family of advanced orthoses.

**Features:**

- Dynamic extension and flexion assist in one component, easily reversed by the patient or caregiver.
- Extension or flexion ROM limits for protected motion, support and positioning.
- Static progressive stretch option with simple worm drive adjustment.
- Improved lock for easy donning and doffing by the patient or caregiver.

**Ultraflex ONE™ is The Only ONE™ you will ever need again for a complete bracing solution!**

**"With day and night bracing, my muscles are looser and I can walk farther."**

Custom-made

**Adjustable Dynamic Response™ (ADR™) for Adult and Pediatrics**

- ADR™ AFO with anterior shell and SMO CROUCH
- ADR™ AFO with posterior shell EQUINUS
- ADR™ AFO with tabs and SMO EQUINUS AND CROUCH
- USS KAFO with cable release QUAD WEAKNESS
- Unilateral KO ADR™ KAFO ADR™ single upright QUAD WEAKNESS

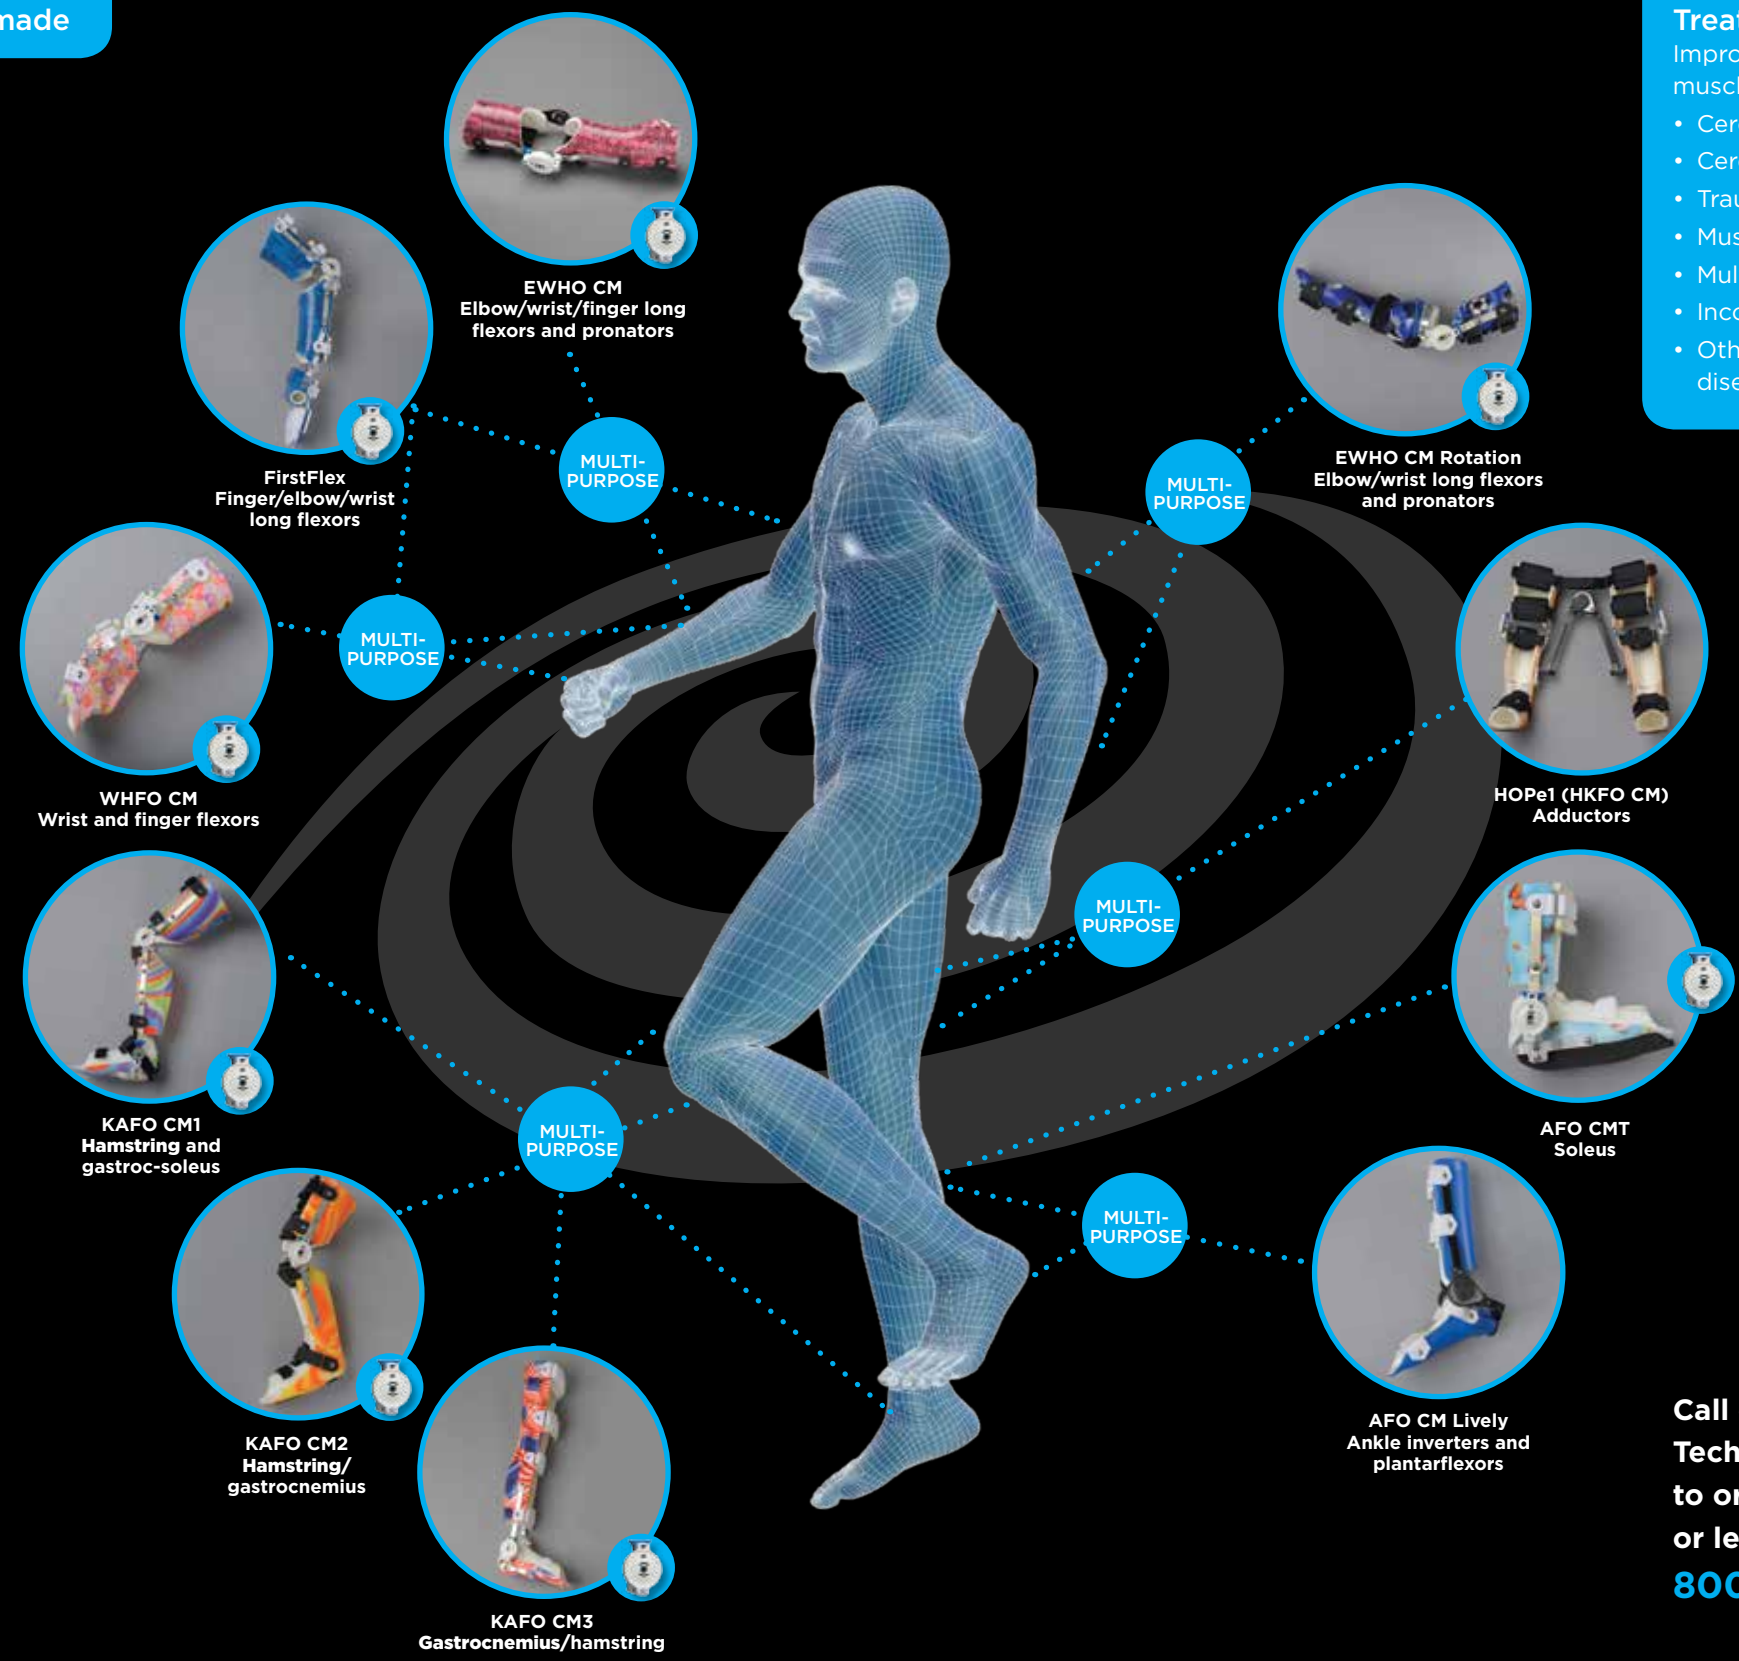

Patented elastomer technology:

- Posterior channel augments tibialis anterior at initial contact
- Anterior channel augments gastroc soleus from mid-stance through terminal stance
- KO ADR for quad weakness to augment knee loading response

**Legend**

Ultraflex ONE™ - provides dynamic extension/flexion assist, static progressive extension/flexion and extension or flexion limits

Custom-made

**Treatment Specialties**  
 Improve dynamic and static muscle ROM for:

- Cerebral palsy (CP)
- Cerebral vascular accident (CVA)
- Traumatic brain injury (TBI)
- Muscular Dystrophy (MD)
- Multiple Sclerosis (MS)
- Incomplete Spinal Cord Injury
- Other central nervous system diseases or disorders
